

# *Ancient Mysteries Researcher* Curriculum

## Ancient Aliens

- Predominant references to aliens in relief artwork, artifacts, and historical record
- Assess cultural impact in both modern and ancient times
- Envision the phenomena as a whole

## Spirituality

- Faith-based and religious mysteries
- Spiritual belief's role with human consciousness and psyche
- Commonalities among multiple religions

## Locations

- Places from around the world exhibiting unique and mysterious characteristics
- Building structures, construction methods, intrinsic value, and worldly influences
- Similarities between distant civilizations and cultures

## Nature

- Phenomena appearing as mysterious with potential natural explanation
- Extreme events as a result of weather, magnetism, and environmental process
- Unknown creatures with relation to mystics or spiritual beliefs

## Unified Theory

- Examine symbiotic relationships through multiple scientific disciplines
- Connect mysteries of the ancient world
- Relate modern interpretation and assess impact on field study

## Time & Space

- Cosmological roles which affect human curiosity
- Otherworldly relationships between mankind, space, and time
- Wonders and mysteries of the universe

## Mystics

- Examine topics at the fringe of scientific explanation
- Ideas and theoretical concepts in mythologies
- Philosophical thought and similarity in belief systems

## Ghosts

- Parapsychology and paranormal realms
- Extrinsic influences from conscious awareness and belief systems
- Metaphysic connection to mystics and spirituality

## Acoustics

- Properties of sound waves affecting matter
- Visualizing sound and its hidden secrets
- Using sound to levitate or move large objects for megalithic construction

## Review

- Construct model relationships applying concepts from each individual subsection
- Determine potential for discovery given fact-based evidence
- Share knowledge and request peer reviews
- Repeat process
